Highlights

Unique OneBlade Technology

The Philips OneBlade has a revolutionary new technology designed for facial styling and body grooming. It can trim, edge and shave any length of hair. Its dual protection system – a glide coating combined with rounded tips – makes shaving easier and comfortable. Its shaving technology features a fast-moving cutter (200x per second) so it's efficient – even on longer hairs.

Trim it down

Trim your beard to an even length with the included adjustable precision comb. Dial up one of the 12 lock-in length settings to get everything from a 5 o'clock shadow, to a tight trim, to a longer beard style.

Edge it up

Create precise edges with the dual-sided blade. You can shave in either direction to get great visibility and see every hair that you're cutting. Line up your style in seconds!

Shave it off

OneBlade doesn't shave as close as a traditional blade – so your skin stays comfortable. Go against the grain and shave off any length of hair easily.

Contour following

OneBlade follows the contours of your face allowing you to effectively and comfortably trim and shave all areas of your face.

Dual-sided blade

OneBlade follows the contours of your face, allowing you to effectively and comfortably shave all areas. Use the dual-sided blade to style your edges and create clean lines by moving the blade in any direction.

12-length precision comb

The versatile precision trimming comb offers length settings from 0.5mm to 9mm, giving you an even trim at exactly the length you want.

Durable OneBlade

The blades are designed for lasting performance. For optimal performance, you will only need to replace each blade every 4 months*. Replacement is easy and hassle free.

Wet & dry

OneBlade is water resistant, so it is easy to clean: just rinse it under the tap. You can shave wet or dry, with or without foam – whichever you prefer.

Specifications

Trimming & shaving performance
